

Creating Groups and Dockets in REN Web

Presenters: Parm Hakey
Nathan Nordin

November 2021

Agenda

- **REN Web Overview**
- Creating Groups
- Creating Dockets
- Adding Existing Groups to Dockets

REN Web Overview

- REN Web provides an easy-to-use interface to create and publish groups and dockets.
 - Created dockets are transmitted through REN Central to REN participants in the interline route.
- REN Web validates dockets using Industry Reference Files, Umler and Shipment Condition Files.
- Users are also able to search for any dockets that they are party to.
- REN Web ensures valid and timely auto rating is applied to revenue waybills for ISS.

Agenda

- REN Web Overview
- **Creating Groups**
- Creating Dockets
- Adding Existing Groups to Dockets

Why Create Groups in REN Web?

- You can easily reuse groups across multiple dockets for shipment, patron, geography and commodity groups.
- Groups save time from having to manually enter and look up to enter a large set of data.
- Groups ensure consistency across the industry – all groups are public and open for use by any REN participant.

What is a PNDR?

- A set of four codes that identify a specific docket version:
- **P**roposer - This code identifies the SCAC of the docket's creator.
- **N**umber - This identifies the docket control number as assigned by the REN Web user.
- **D**ocket - This code is a unique number automatically assigned to the docket by REN Web.
- **R**evision - This number identifies the revision number of the docket.

EQOS
Shipment Condition Standards
EQOS

EQOS Effective Date: 09/01/2004

SECTION 1 – CONDITION ANALYSIS

Condition Code:	EQOS
Application Category:	1
Title:	Equipment Ownership Status
Description:	Denotes ownership status of equipment which may or may not be used to move shipment.
Needed For Rate Application:	Yes
Needed To Calculate Total Charges:	No
425 Data Segment:	N7
Data Element:	102 (N7), 206 (N7), 207 (N7)
Business Use:	The condition is used to differentiate prices based on who owns equipment such as railroad-owned, shipper-owned, etc.
Plus (+) Interpretation:	Price applies in equipment with ownership status specified.
Minus (-) Interpretation:	Price does not apply in equipment with ownership status specified.
Dependencies:	None

SECTION 2 – VALUE ANALYSIS

Value Field:	Code denoting ownership or leased status. Codes 'O' and 'H' are treated as text only.	
	H - Highway carrier	
	S - Shipper owned or leased	
	O - Steamship lines	
	R - Railroad owned or leased	
Format:		A/N
Field Length:		1,0
Ref. Marks (Appendix H):		1,3
Range F Field:	n/a	
Format:		n/a
Field Length:		n/a
Ref. Marks (Appendix H):		2
Range T Field:	n/a	
Format:		n/a
Field Length:		n/a
Ref. Marks (Appendix H):		2
Data Source:	Waybill and Umler	

SECTION 3 – PUBLISHED TEXT

Recommended Text:	<ul style="list-style-type: none"> Price applies in 'V' equipment. Price does not apply in 'V' equipment.
Index:	Equipment Ownership
Recommendations and Comments:	
Should There Be a REN Edit:	No
If Yes, what should be Edited:	n/a
Data Source for The Edit:	n/a

Revised May 2019
75

Directory of Shipment Conditions

- The directory contains all available shipment conditions for use in REN.
- It describes each condition code in detail, including the required length and the range of values that can be supported.
- Available on Railinc's website at:
<https://public.railinc.com/sites/default/files/documents/ShipmentConditions.pdf>

Shipment Condition Reference:

The screenshot shows a PDF document titled "Directory of SHIPMENT CONDITIONS" with the RAILINC logo. Below the title page, the document details the condition code EQOS, including its application category, title, description, and various data segments. The effective date is listed as 09/01/2004.
