Overview

MD-115 Report

MD-115 Reports are submitted to Railinc for analysis with the goal of reducing mechanical service interruptions (derailments and other line of road failures) and increasing yard and shop efficiency.

The MD-115 Report must be submitted to Railinc within 15 days of wheel removal for each wheel removed for Why Made Codes 66, 68, 69, 71, 83, 85 and 1D.

Rule 41 in the *Field Manual of AAR Interchange Rules* establishes the minimum mechanical requirements for removing defective wheels. Refer to Rule 41 in the *Field Manual of the AAR Interchange Rules* for more information.

Mechanical Defects are overseen by the AAR's Wheel, Axle, Bearing and Lubrication Committee (WABL). If you have questions about completing Form MD-115, send an email to wabl@aar.com. If you experience technical difficulties with the electronic form, contact Railinc's Customer Success Center at csc@railinc.com or 877-724-542.
